Value. Speed. Durability. Connectivity.

Crisp, Accurate Bar Codes at Full Speed!

The Paxar 9855 Tabletop Bar Code Printer is the best-in-class solution for shipping and item labeling in distribution centers, manufacturing plants and shipping hubs. Specifically engineered for the retail supply chain environment, the Paxar 9855 Tabletop Bar Code Printer can help you move merchandise quickly through **YOUR** supply chain!

Productivity enhancements for this printer include:

- ◆ Super fast 150 MHz processor and print speeds up to 12 IPS for quick printing
- ◆ 200-meter supply rolls and 600-meter ribbons require 31% fewer stops to reload
- ◆ Easy, fast, intuitive supply loading decreases downtime
- ◆ DC powered cart version available for increased mobility and productivity!

Get Connected!

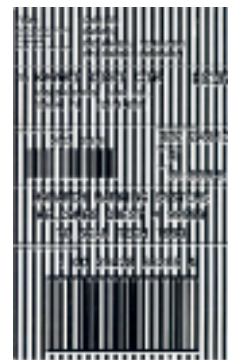

Paxar offers a wide array of the latest in connectivity technology. Universal Serial Bus (USB), parallel and serial ports all come standard with the 9855 Tabletop Bar Code Printer. Other connectivity options include: Twinax/coax and Dual Wireless 802.11b and Wired Ethernet network interface card. This innovative wireless interface card allows you to run your printers on a wireless network, with the ability to change instantly to a wired connection if the wireless network becomes overloaded, enhancing your productivity.

PaxarNet 2 Speaking of enhancements, Paxar is enhancing our network management tool, PaxarNet. With PaxarNet 2, companies control all 9800 printers, anywhere in the world, from a central location. You can even receive email alerts when printers need attention at a remote location.

Make Sure You Get The Bar Code You Want....Everytime!

Manufacturers can be frustrated by retail charge-backs due to bad bar codes. Those fines add up! The Paxar 9855 can make sure you get the bar code you want...Everytime! Here's how:

- ◆ Paxar's unique ribbon control eliminates "ribbon wrinkle".
- ◆ "Fail Safe Dot Shifting" automatically corrects for "bad dots".
- ◆ The "Gray Box Alert" prints a gray box in place of a bad bar code when dot shifting can't fix the problem.

Verifier Overstrike

Our state-of-the-art Model 938 verifier provides added assurance. The overstrike print alerts you right away when a label isn't 100% perfect.

Combining the Paxar 9855 Tabletop Bar Code Printer and the Paxar 938 Verifier, you can verify at lightning-fast speeds – up to 12 IPS!!

The Bottom Line...No Bottom Liner!

Wouldn't it be great if you could save 40% in shipping charges everytime you receive labels? How about stocking your labels in 40% less space? It's easy! Order Linerless Labels for your 9855 Tabletop Printer with Linerless Option. No liner means more labels in each box. More labels mean fewer boxes. Fewer boxes mean lower shipping costs and less storage space. It's that simple.
